

# 5 steps to successful image processing implementation

**octum** Experts in Machine Vision Solutions.

# 1

## Plan ahead

Incorporate image processing into the system design from the outset.

# 2

## Realistically assess space requirements and installation position

Cameras need a clear view.

# 3

## Train operators

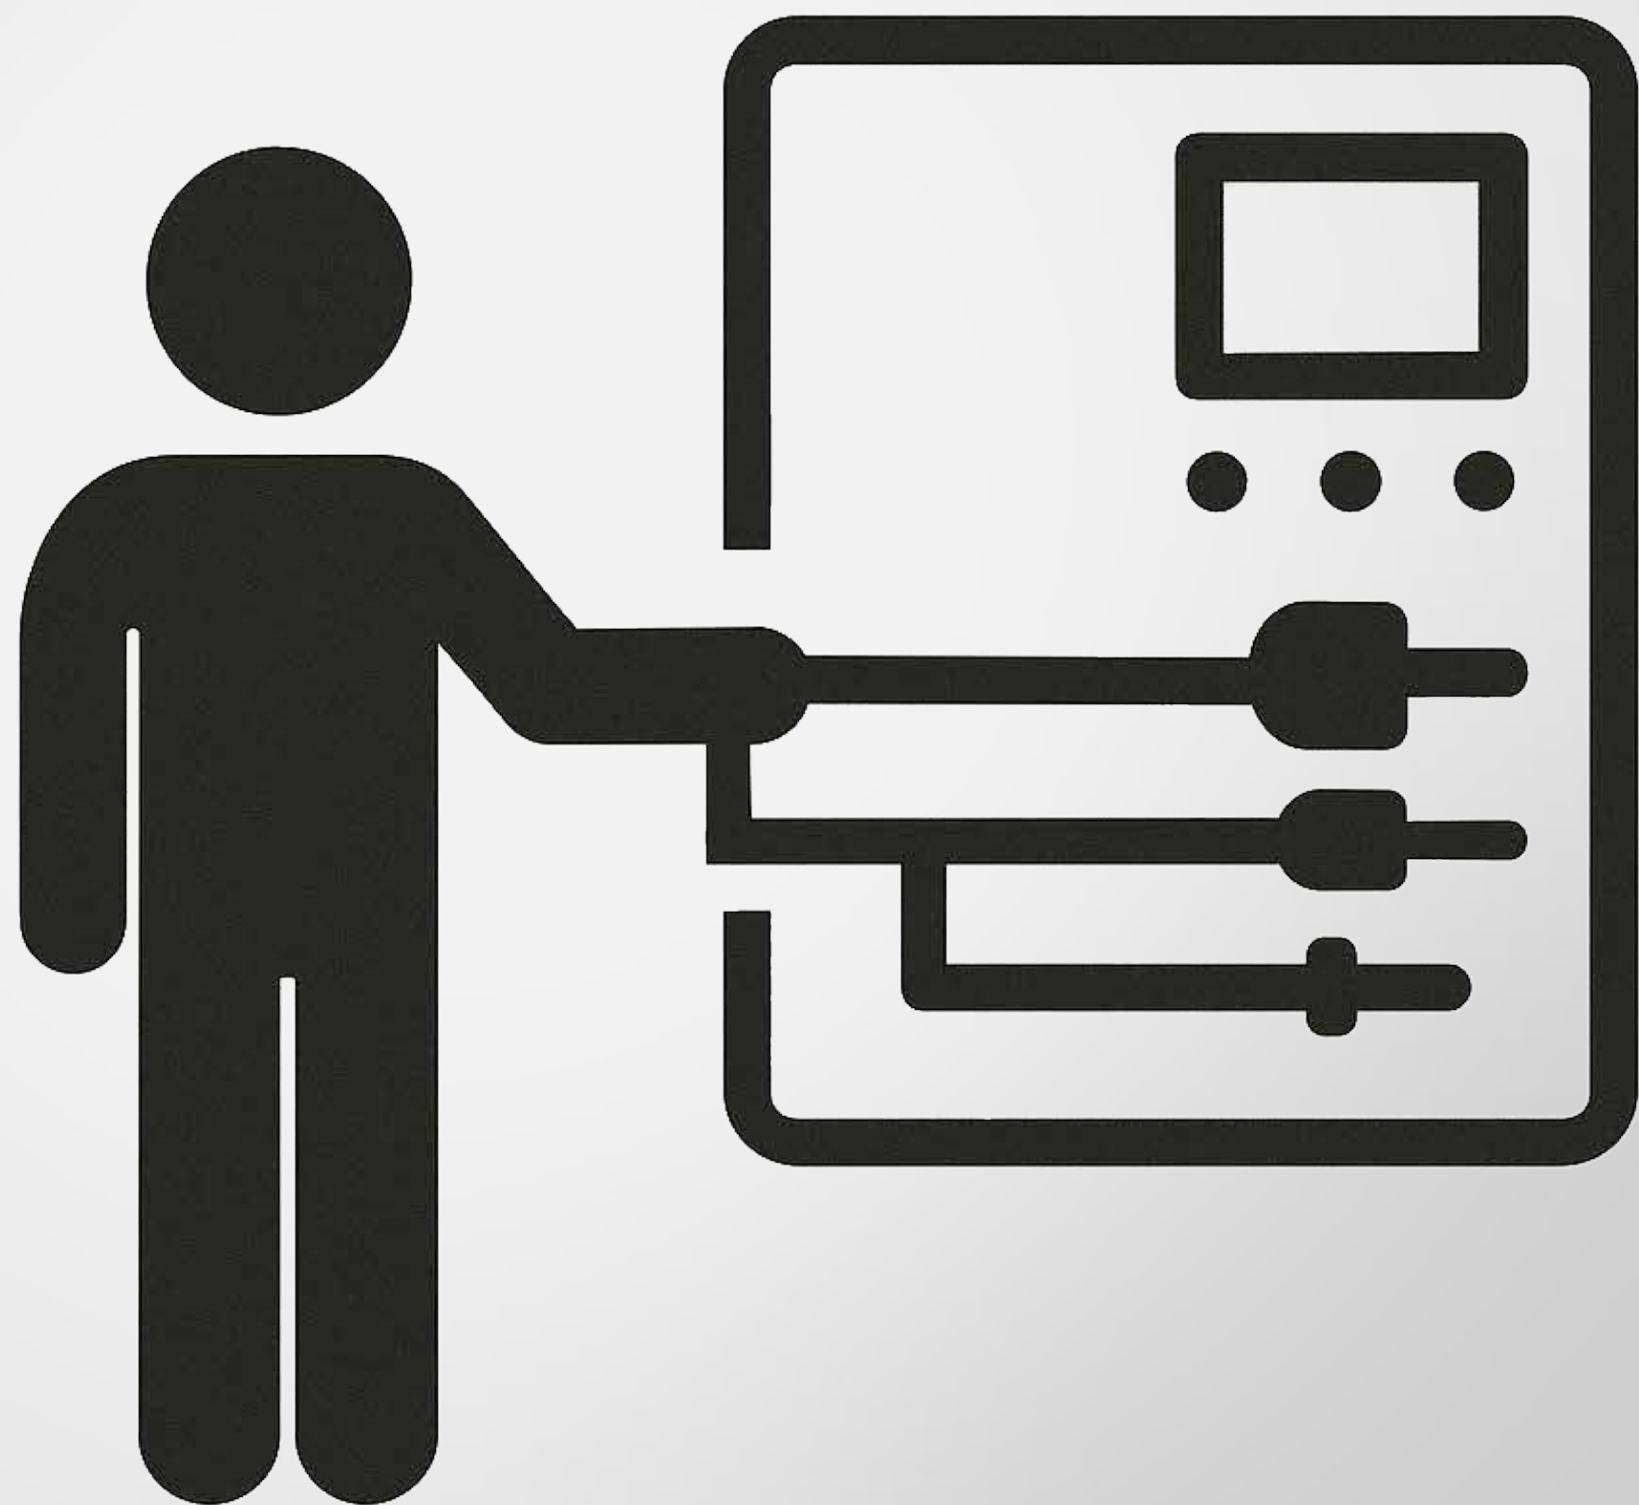

The benefits of a system also depend on its acceptance in everyday life.

# 4

## Clearly define interfaces

Communication with PLC & MES is crucial.

# 5

## Choose flexible systems

in order to be able to respond to product variants or new requirements.
